ABOUT US

At WildTubs, we're here to help you create the ultimate relaxation experience right at home. We specialize in premium hot tubs and saunas that bring you the perfect combination of luxury, quality, and comfort. Our goal is simple: to create products that not only look great but last for years, so you can enjoy true relaxation without a second thought.

We take pride in the craftsmanship of our hot tubs and saunas, using top-of-the-line materials to ensure they stand the test of time. Whether you're soaking in the warm, soothing waters of one of our hot tubs or enjoying the peaceful steam of a sauna, our products are built to bring you comfort and calm for many years to come.

Life can get hectic, but with WildTubs, you can create a peaceful oasis in your own home. Our hot tubs and saunas are designed to help you recharge, de-stress, and make the most of those precious moments of relaxation. After all, we believe you deserve a space that helps you relax, rejuvenate, and truly enjoy life.

Fiberglass hot tub with integrated heater

Outside diameter		Height outer
2000 or 2250 mm		1050 mm
Inside diameter		Height inner
1800 or 2000 mm		950 mm

		
Water capacity	Material	Weight
~1060-1490 l	Fiberglass	150 - 180 kg
		
Base of Hot tub	Heater type	Heating time at 10°C
Wooden painted base	Integrated heater	2-3 hours

Recommended for
4-6 or 6-8 persons

The round fiberglass hot tub with an integrated 30 kW heater is one of the most popular choices.

It comfortably accommodates approximately six people, while the compact heater takes up minimal space.

Additionally, the top of the heater can be used as a seating area for small children, making this hot tub an excellent option for the whole family.

Base of Hot tub	Heater type	Heating time at 10°C
Wooden painted base	External heater	2-3 hours

Recommended for
4-6 or 6-8 persons

A fiberglass hot tub with an external heater provides more interior space and can accommodate one more person than a model with an integrated internal heater.

If you have enough space in your yard, this is the perfect choice for a comfortable and enjoyable relaxation experience.

The Polypropylene cold tub is your personal retreat for a refreshing, rejuvenating experience.

Perfect for post-workout recovery or simply enjoying the benefits of cold water therapy, this tub helps reduce inflammation and promotes faster muscle recovery.

Made from high-quality, durable polypropylene, it's built to last and handle all weather conditions.

Hot tub lids

Hot tub lids are crucial for safeguarding your tub from environmental elements such as rain, debris, and sunlight. They not only protect the hot tub but also enhance its overall appearance. By keeping the tub covered, lids help maintain cleanliness, prevent debris buildup, and improve heat retention, making the hot tub more energy-efficient.

COLORS

Hot tub cladding

Thermo wood

- *Resistant to moisture, mold, and decay*
- *More durable than regular wood*
- *An eco-friendly choice, free from chemical additives*
- *Aesthetically pleasing, with a natural dark brown appearance*
- *Ideal for those seeking a durable, natural finish*

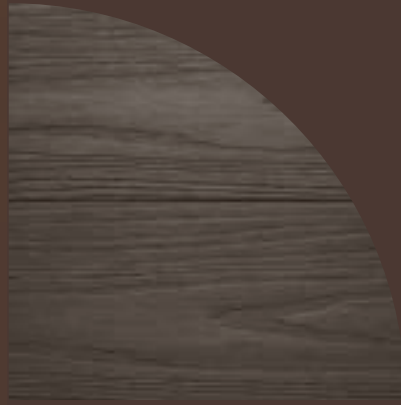

Spruce wood

- *Cost-effective choice*
- *Absorbs paints and protective treatments well*
- *Perfect for those seeking a classic, natural look*
- *Regular maintenance and impregnation recommended to ensure long-lasting durability*

WPC

- *Highly resistant to environmental factors*
- *Does not warp, crack, or splinter*
- *Low maintenance – no additional treatment required*
- *Durable, modern, and aesthetically pleasing finish*
- *Perfect for those seeking long-lasting performance with minimal effort*

Larch wood

- *High resistance to environmental factors*
- *Long-lasting and durable even without additional treatment*
- *The naturally pronounced texture of the wood.*
- *Eco-friendly choice with minimal maintenance required*
- *Ideal for those who value natural, long-lasting wood*

TYPES OF CLADDING

Hot tub steps

A-type

Two-step enclosed stairs are the most popular choice—they not only match the design of the hot tub but also provide stability and durability. Additionally, LED lighting can be installed to add a cozy and elegant touch to your evening soaks.

C-type with handrail

Type C stairs with a handrail offer the same sturdy, elevated design as Type C but with the added safety and support of a handrail. This makes them an excellent choice for those who prioritize safety when entering or exiting the hot tub. These stairs can be customized as left-handed or right-handed, and the space underneath can accommodate a 2m³/H filtration system, adding functionality and convenience.

B-type

Type B hot tub stairs are designed with a simple, open structure, offering a clean and minimalist look. These straightforward stairs provide practical and easy access with a focus on simplicity and ease of use.

A+-type

Type A+ stairs offer an upgraded version of Type A, featuring added stability and a more refined design. These stairs may have a wider step surface and improved materials, ensuring easier access and a sleeker appearance.

C-type

Type C hot tub stairs are robust and versatile, offering excellent stability with a slightly elevated design. These stairs can be customized to be left-handed or right-handed, providing flexibility in installation. Additionally, the space under the Type C stairs can accommodate a 2m³/H filtration system.

TYPES OF STEPS

Wood burning heaters for hot tub with external heating

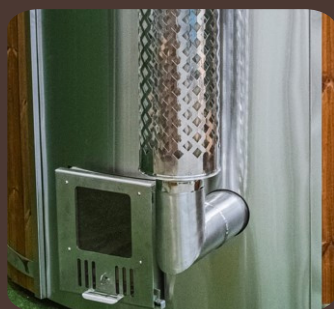

External square or hexagone 304 or 316 AISI + chimney heat protection

Available in 22 kW, 28 kW, and 30 kW models, this square (4-sided) heater efficiently heats hot tubs of all sizes, offering reliable performance and precise temperature control for optimal comfort.

Integrated 304 or 316 AISI + chimney heat protection

This 30 KW heater, is specifically designed for hot tubs with integrated heating systems. It offers powerful, efficient heating with added chimney heat protection, ensuring safe and reliable performance in all outdoor environments.

Integrated stove Horizon 304 or 316 AISI + chimney heat protection

The 25 kW heater provides efficient heating for hot tubs that is made for external heater, this heater can fit under hot tub bench and does not take so much space as standart 30 kW integrated heater

Integrated stove corner 304 or 316 AISI + chimney heat protection

This 30 kW heater is designed for hot tubs squer jacuzzi saving some space in you garden and looking very luxurious

TYPES OF HEATERS

TYPES OF STEELS

- **304 AISI Stainless Steel:** Known for its good resistance to corrosion and heat, 304 AISI stainless steel is a popular choice for outdoor wood-burning stoves. It offers reliable durability and is well-suited for various outdoor applications.
- **316 AISI Stainless Steel:** This material offers the highest resistance to corrosion, heat, and chemicals among the stainless steel types. Although it is more expensive, 316 AISI ensures the highest level of protection and longevity, making it ideal for harsh outdoor environments.

Electric heaters

ELECTRIC HEATERS

Electric heaters 3/ 6/ 9/ 12/ 15 or 18 kW

Electric 3-18 kW heaters offer efficient, precise heating for hot tubs, providing consistent warmth and easy temperature control. With Wi-Fi connectivity, you can adjust settings remotely for added convenience, ensuring an optimal soaking experience every time.

Available in standard Incoloy or titanium (For use on salty water)

Heat pump

The heat pump is highly efficient, using only 1.5 kW of electricity while converting it into 11 kW of heating power in summer or 3 kW in winter. With integrated Wi-Fi, you can easily monitor and control the temperature remotely for optimal comfort year-round.

SPA systems and LED

Air bubble system

The pump is recommended for use with 12 to 16 jets, offering a power output of 0.7 kW, ensuring enjoyable bubble effect experience.

Hydro massage system

The hydro massage system features durable stainless steel jets, resistant to chlorine, ensuring long-lasting performance. The perfect choice for those who want to massage their backs in the bath. You can choose from standard or illuminated sprays and arrange them in the bathroom according to your wishes.

LED lighting

- Large 50 mm LED Lights: Recommended to use a minimum of 2, with a maximum of 5 for optimal lighting.
- Mini 20 mm LED Lights: Ideal for using 10-12 inside, but can also be installed on steps or on the exterior of the cladding for added ambiance.

Filtration systems

A filtration system is essential for maintaining water cleanliness in hot tubs by removing dirt, debris, and contaminants. It helps keep the water clear, fresh, and safe for use. Additionally, a good filtration system improves water circulation, reduces the need for chemicals, and ensures the longevity of the hot tub by preventing build-up in the plumbing and equipment.

Sand filtration

- Removes debris, skin particles, hair, and other impurities from hot tub water
- Installed outdoors, may require an enclosure or C-type steps
- Ensures clean water and prolongs the hot tub's lifespan

Cartridge filter

- Captures fine debris and contaminants for effective filtration
- Easy to remove and clean
- Helps maintain clear water and prevents system buildup
- Can be hidden under C-type stairs or a covering box.

UV Filtration

- Uses ultraviolet light to eliminate bacteria and harmful microorganisms
- Ensures cleaner, safer water with minimal chemicals
- An efficient, eco-friendly solution for maintaining water hygiene
